

A LEVEL RESULTS PRESS RELEASE 15/08/2019

Farmor's Sixth Form students celebrated a brilliant set of A level results today. Value-added scores, which measure the progress made from GCSE to A Level, were the best for the last three years – a testament to how dedicated and enthusiastic the class of 2019 have been. Some were still jet-lagged and weary from their month-long Kenya adventure, but still made it in to celebrate with their friends and staff. After two years of working closely together in such small classes, the pleasure of success is certainly mutually shared. Over a fifth of grades were A/A* and the upward overall trend continued again this year with 82% of grades at A*-C. The overall pass rate held steady at 99%. Headline figures are: A*/A 21% A*-B 51% A*-C 82% A*-E 99%

Head Girl, Charlotte Gleeson was thrilled to have secured her place at Cambridge to study Modern and Medieval Languages achieving A*A*A* in English Literature, French and Psychology to add to her A* for EPQ last year.

Head Boy, Alex Eaglestone is heading to Loughborough to study Geography, having gained A*AA in Geography, Economics and Maths. This follows his inspiring visit this summer to Chama District in Zambia where we are helping to build a girls school.

Jake Bevans achieved A*A D in Business, Economics and Drama. He is intending to pursue a career in Business.

Ellie Barnes achieved A* A* A in Psychology, Biology and Chemistry. She is planning a Gap year before pursuing a career in Medicine.

Evie Horrell achieved A* A B in Graphics, Photography and English Language & Literature. She is going to Bath Spa to study Graphics.

Freddie Marsh achieved A* A* B in Maths, Further Maths and French. He is considering his options for next year.

A portrait of a young woman with blonde hair tied back, smiling slightly. She is wearing a dark green top with a small white and brown floral pattern. She has a thin necklace with a small, light-colored pendant. The background is a plain, light-colored wall.

A group of young women are seated at a long wooden table in a computer lab, smiling and looking at their computer monitors. The woman in the foreground wears a white sweatshirt with red rose embroidery. In the background, a red bulletin board displays various notices, including one for 'PYTHON' and another for 'Python for Data Science'. A clear plastic bag filled with colorful pens and pencils sits on the table in the foreground.
