Dear Parents & Guardians,

We are changing the way we offer support to students from households with financial constraints. Previously, parents were required to complete a Trustees form every time they were seeking financial support with an educational resource or activity.

From this year, we are simplifying the process to save multiple forms being submitted. This means that a parent can submit their application at the beginning of the school year, and we will allocate financial support based on the students curriculum-based requirements for the whole period, Sept-July.

The form is now on the school website available to download, and parents can register to be able to access financial support next year, September 2024.

Kinds regards

Sarah Hughes
