

“Those who can imagine anything, can create the impossible.” Alan Turing

Subject Head: Helen Bristow **Contact:** hbristow@farmors.gloucs.sch.uk

In a rapidly developing world, it has never been more important for our students to be technologically aware. We aim to equip our students to use computational thinking and creativity to understand and change the world. Computing has deep links with mathematics, science and design and technology, and provides insights into both natural and artificial systems.

During their time at Farmor's, students will study the design, development and analysis of software and hardware used to solve problems in a variety of business, scientific and social contexts. They will learn how to stay safe online, develop their coding skills and improve their computational thinking, critical thinking, analysis, and problem-solving skills.

At KS3, students will follow a scheme of work based on the Teach Computing scheme. This has been built around an innovative progression framework where computing content has been organised into interconnected networks. The resources have been created by subject experts, using the latest pedagogical research and teacher feedback. KS4 & KS5 follow the AQA exam board specifications.

Farmor's School Computing Department

	Topic 1	Topic 2	Topic 3	Topic 4	Topic 5	Topic 6	Topic 7	Topic 8	Topic 9	Topic 10	Topic 11
Year 7	Digital Literacy: Edulink, email, file management. Brief introduction to Microsoft applications: Word, Excel, PowerPoint. C1, CS1, CS2	Programming: Robots	Cybersecurity: Staying safe online. Cyberbullying. C2	Data Representation: Binary - decimal conversions. DR1	Programming: Python	Data Representation: Binary addition. DR2	Databases: Flat file and relational basics. D1	Programming: Python	Cybersecurity: Threats and protection. C3	Programming: Micro:bits	Projects: Digital literacy and research
Year 8	Data Representation: ASCII and Unicode. DR3	Programming: Python	Networks: Hardware, networking components, PAN, WAN, LAN, wired & wireless. N1	Computer Systems: Hardware components, software, CPU, FDE CS3	Programming: Python	Data Representation: Images and Sound. DR4	Computer Systems: Memory and storage. CS4	Programming: Micro:bits	Databases: SQL - single table focus. D2/D3	Programming: Python and trace tables.	Projects: Digital literacy and research
Year 9	Cybersecurity: Social engineering and Malware. C4	Programming: Python.	Networks: Protocols and layers. N2a, N2b	Data Representation: Logic gates and Boolean algebra. DR5	Programming: Micro:Bits	Databases: SQL - single table, multiple tables. D2, D3	Computer Systems: CPU, FDE, Memory and storage. Ethical, legal and environmental impacts of technology. CS4, CS5	Programming: Python.	Data Representation: Hexadecimal conversions. DR6	Networks: Network security. N3	Projects: Digital literacy and research

Farmor's School Computing Department

	Topic 1	Topic 2	Topic 3	Topic 4	Topic 5	Topic 6	Topic 7	Topic 8	Topic 9
Year 10	<p>Programming - sequence: Determine the need for translators. Use sequence, variables, and input in Python. Design programs using a flowchart.</p>	<p>Computer Systems: Describe the role of the CPU. Explain the processes of the fetch-decode-execute cycle. Determine the role of main memory and secondary storage. Construct truth tables for three input logic circuits. Write a program using assembly language (LMC).</p>	<p>Programming - Selection: Use randomisation in programs. Work with arithmetic and logical expressions. Use selection and nested selection in Python.</p>	<p>Programming - Iteration: Use a while loop and a for loop in Python. Perform validation checks on data entry. Design programs using pseudocode.</p>	<p>Data representations: Explain how numbers, text, images, and sound are represented using binary digits. Perform operations on binary digits. Convert between units of measurement</p>	<p>Programming - Subroutines: Explain the differences between a procedure and a function. Describe scope of variables. Use functions and procedures as part of the structured approach to programming. Test a program for robustness.</p>	<p>Cyber security: Describe the various ways that users and organisations can be affected by cyberattacks. Demonstrate how organisations can prevent cyberattacks.</p>	<p>Algorithms 1 & 2: Define the terms 'decomposition', 'abstraction', and 'algorithmic thinking'. Use trace tables. Describe a linear and binary search. Explain the key algorithms for a bubble, merge, and insertion sort.</p>	<p>Programming - Strings & Lists: Define the term 'graphical user interface' (GUI). Perform string handling operations. Describe the differences between a list and an array. Manipulate a list. Work with 2D lists.</p>
Year 11	<p>Networks: Explore how a computer network works from the hardware required to the protocols used for communication. Explore simulations of networks using Packet Tracer software.</p>	<p>Programming - Dictionaries & Data: Describe data structure, dictionaries, text files, CSVs and alternative approaches to programming solutions.</p>	<p>Relational databases and SQL: Describe a database and list its key terms. Determine the difference between a flat file and a relational database. Use structured query language (SQL) to retrieve and update data in a database.</p>	<p>Privacy and wider security: Determine the ethical, legal, environmental, and cultural impacts of technology.</p>	<p>Revision, assessment, feedback, programming practice.</p>				

Farmor's School Computing Department

	Topic 1	Topic 2	Topic 3	Topic 4	Topic 5	Topic 6	Topic 7
Year 12	<p>Fundamentals of programming: Programming basics; selection, iteration, arrays, subroutines. Files and exception handling.</p>	<p>Problem solving and theory of computation: Solving logic problems. Structured programming. Writing and interpreting algorithms. Testing and evaluation. Abstraction and automation. Finite state machines.</p>	<p>Data representation: Number systems. Bits, bytes and binary. Binary arithmetic and the representation of fractions. Bitmapped graphics. Digital representation of sound. Data compression and encryption algorithms.</p>	<p>The Internet: Structure of the Internet. Packet switching and routers. Internet security. TCP/IP, standard application layer protocols. IP addresses. Client server model.</p>	<p>Data structures: Queues. Lists. Stacks. Hash tables and dictionaries. Graphs. Trees. Vectors.</p>	<p>Communication: Communication methods. Network topology. Client-server and peer-to-peer. Wireless networking, CSMA and SSID. Communication and privacy. The challenges of the digital age.</p>	<p>Databases and software development: Entity relationship modelling. Relational databases and normalisation. Introduction to SQL. Defining and updating tables using SQL. Systematic approach to problem solving.</p>
Year 13	<p>Algorithms: Recursive algorithms. Big-O notation. Searching and sorting. Graph-transversal algorithms. Optimisation algorithms. Limits of computation.</p>	<p>Regular languages: Mealy machines. Sets. Regular expressions. The Turing machine. Backus-Naur Form. Reverse Polish notation.</p>	<p>OOP and functional programming: Basic concepts of object-oriented programming. Object-oriented design principles. Functional programming. Function application. Lists in functional programming. Big data.</p>	<p>Computer organisation and architecture: Internal computer hardware. The processor. The processor instruction set. Assembly language. Input-output devices. Secondary storage devices.</p>	<p>Hardware and software: Hardware and software. Role of an operating system. Programming language classification. Programming language translators. Logic gates. Boolean algebra.</p>
